

# NEW TRAFFIC CONTROL RESTRICTIONS

## ON LEG 1 AND AT CHECKPOINT 1

(See diagram on next page)

There are new traffic control restrictions in place on Leg 1 and at Checkpoint 1 for 2009.

### Leg 1

- The area between the Start Line and the pull-out at km 3.8 will be “swept clean of vehicles” when the road closes at Haines Junction at 8:15 AM. No vehicles will be allowed in this section of the road.
- The only vehicles which will be allowed in the pull-out at km 3.8 will be those with vehicle support ID in their right front windshield. All other vehicles should move past checkpoint 1 to reduce the volume of traffic on (busy) leg 1

### Checkpoint 1

- The right lane of the road will be closed to vehicle traffic in the 1 km section **prior to and** the 1 km section **after** checkpoint 1 from 8:00 – 10:00 AM. Bikes will be directed into the right lane and vehicles will be directed into the left lane on both sides of checkpoint 1 (See diagram on back side of this page)

These changes are driven by feedback from Race officials and RCMP. PLEASE play your part in keeping the road safe for cyclists by following these rules:

- pull your vehicle completely off the road before stopping and getting out
- do NOT shadow your rider on the road by driving along at the rider’s speed. Instead, offer support by driving ahead of your rider and then pull off the road to offer them support from the side of the road (not from your vehicle)
- do not pass cyclists unless it is safe to do so; yield to cyclists and oncoming traffic
- obey all race officials, volunteers, and emergency response personnel

**Thank you!**
